I'm a frontend developer and UX designer who enjoys building fast, accessible interfaces with a strong sense of structure and clarity. I've mostly worked with Angular and React, but I'm also comfortable on the backend when needed—connecting APIs, using Node.js, and working with SQL or noSQL databases.

I came into tech from a finance background, learning everything through hands-on experience while working. That self-taught path shaped how I work: practical, curious, and focused on real-world impact. I've recently relocated to Denmark and am currently looking for new opportunities to contribute, grow, and keep learning through meaningful projects.

Tools & Skills

Javascript	RxJs	REST API Design	CI/CD Pipelines
Typescript	TailwindCSS	Node.js	Python (Basic)
React	Testing tool	Express.js	UI/UX Design
Next.js	HTML5 & CSS3	MongoDB	Figma
Angular	Versioning (Git)	PostgreSQL	Photoshop
State Management	Responsive design	ORM (Prisma/Mongoose)	Illustrator

Experience

Frontend Engineer
Accenture Technology
Nov 2023 – Feb 2025
Milan, Italy

Contributed to large-scale national public-sector projects—primarily in healthcare—using **Angular** and **React**. Collaborated closely with backend teams and participated in full project cycles from design handoff to deployment, focusing on usability, accessibility, and scalability.

- Developed and maintained frontend features using **TypeScript**, **Angular**, and **React** within a **Node.js** environment
- Integrated **REST APIs** and translated Swagger specs into functional, user-facing components
- Converted **Figma** designs into accessible, responsive UI with strong attention to **WCAG** compliance
- Contributed to internal libraries and documented them in **Storybook**, enabling live previews for stakeholders
- Participated in cross-team **usability testing** to validate UX flows and improve user experience
- Worked closely with backend developers to align data structure, debug API interactions, and streamline integration
- Followed **agile** methodology and supported continuous delivery through **Git** based workflows and **CI/CD pipelines**

Frontend Developer & UX Designer
GameStop
Dec 2021 – Nov 2023
Milan, Italy

Frontend developer for the Italian market, contributing to the international redesign of GameStop's e-commerce platforms. Worked across departments and countries to build scalable, accessible solutions aligned with both user needs and business goals.

- Developed UI components using **JavaScript (ES6+)**, **TypeScript**, and **C#** within a **.NET/ASP.NET** architecture
- Contributed to the creation and rollout of the modular UI framework Armogan, adopted across six countries
- Designed responsive, accessible interfaces with **Figma** and **Adobe XD**, customized for local branding and culture
- Developed solutions to streamline internal processes (e.g. product updates, resale flows), improving efficiency for staff and simplifying the experience for customers.
- Integrated and consumed **REST APIs** to support both customer-facing features and internal services
- Led **UX/frontend** efforts on stakeholder-facing spaces and campaign-specific landing pages
- Used **GA4** and **Tag Manager** for analytics support and SEO instrumentation
- Contributions helped drive a +22% SEO score, 7% drop in bounce rate, and 30% increase in conversions

Short-Term Educator
Talentika
Mar 2021 – May 2021
Livorno, Italy

Designed and taught multiple courses for Italian high school students, covering topics like game theory, gamification, personal finance, and neuromarketing. Designed lessons that combined practical UX concepts with behavioral economics, helping students connect abstract ideas to everyday decisions and digital experiences.

Web Content Creator
Starting Finance – non profit
Feb 2021 – Mar 2023
University of Pisa, Italy

Created visual content and infographics for Starting Finance's LinkedIn page to support financial education and outreach. Handled concept development, data visualization, and design execution using **Illustrator**, **Photoshop**, and **Canva**. Worked with the web team to maintain visual consistency and improve engagement across social media platforms (LinkedIn & Instagram).

Education

Università degli studi di Pisa

Bachelor's Degree in Finance, Banking and Financial Markets

Mathematical Models for CDS Pricing under Stochastic and Regression Approaches.

Pisa, Italy

Graduated with Honors 110/110 cum Laude

Certifications

Complete Angular Developer Bootcamp

Zero to Mastery Academy
feb 2024

Mastered Angular framework concepts, from basic to advanced topics, enabling the development of scalable and efficient web applications.

Front End Development Libraries (React)

freeCodeCamp
aug 2023

Gained proficiency in React.js and related libraries, including Redux and React Router, to build dynamic and interactive web applications.

HTML, CSS, and JavaScript for Web Developers

Johns Hopkins University
oct 2021

Learned to create responsive web pages using HTML5, CSS3, and JavaScript, focusing on modern web design principles and best practices.

Google UX Design Certification

Google & Coursera
sep 2021

Completed a comprehensive program covering user experience design fundamentals, including user research, wireframing, prototyping, and usability testing, culminating in a professional UX portfolio.

Languages

Italian	Native - (Mother Tongue)
English	Fluent - C1 CEFR (Certificated)
Danish	Beginner

Soft Skills

I came into tech from a background in finance, guided by a genuine curiosity for how things work and a desire to create digital experiences that feel thoughtful and genuinely useful. Everything I've learned about programming is self-taught, mostly picked up while working full-time, and that self-driven path has shaped how I approach challenges hands-on, persistent, and always learning.

I recently relocated from Italy to Denmark to keep growing in environments that value openness, collaboration, and a sense of purpose in the work. Over the years, I've worked in different kinds of teams sometimes as the only frontend developer on multi-country platforms, taking full ownership of delivery and adapting quickly under business pressure, other times as part of larger cross-functional groups, where I developed a strong appreciation for structure, shared ownership, and iterative delivery.

What has stayed consistent is the way I like to work: with care, curiosity, and a focus on usability. My interest in frontend development and UX goes beyond visuals. It's about creating clarity, building trust through design, and helping people feel grounded in the products they use.

Hobbies

Outside of work, I'm drawn to anything that mixes creativity, challenge, and story. I've always loved videogames, especially ones that demand skill or tell a great narrative — like Dark Souls or Outer Wilds. I've DJed at private parties, run Dungeons & Dragons campaigns as a Dungeon Master, and never turn down a good board game night.

Design is a bit of a side passion too, so I often find myself tinkering in Figma or Photoshop just for the fun of it. I'm also a film lover — Fincher, Nolan, and Zemeckis are favourites — and I travel whenever I can.

So yes, a bit of a nerd, but really just someone who loves immersive worlds and creative problem-solving.
