+45 52 65 23 63
Copenhagen, Denmark

Full-Stack Developer with 5+ years of experience building web applications across SaaS, public-sector, and e-commerce environments using Vue, Angular, React, TypeScript, Laravel, and SQL. Strong frontend and UX focus, with hands-on experience across backend development, AI/RAG integrations, REST APIs, testing, and end-to-end product delivery.

I'm usually happiest somewhere between solving the logic, refining the interface, and asking whether the whole thing could simply work better.

Experience

Frontend Developer (Full-Stack & AI)

Jul 2025 – Present

Hococo Aps *Copenhagen, Denmark*

Build and maintain web and mobile features for Hococo's tenant relationship platform using Vue 3, TypeScript, Laravel, PostgreSQL, and Capacitor.

- Developed AI assistant functionality integrating OpenAI, Claude, and Gemini with retrieval, conversation history, streaming responses, citations, guardrails, and tool/API calling.
- Implement backend functionality including controllers, services, Eloquent models, migrations, validation, authentication/permissions, and REST endpoints.
- Deliver features end to end, from UX/design and logic definition through implementation, testing, and stakeholder demos.
- Built product features including task timers, AI administration tooling, and SALTO-based door-unlocking functionality across web and iOS/Android applications.
- Contribute to the migration from Vue Options API to Composition API using Pinia, TypeScript, Tailwind CSS, and reusable component patterns.
- Write Playwright end-to-end and integration tests, review PRs, and work within GitHub Actions, Docker, and cloud-based deployment environments.

Frontend Engineer

Nov 2023 – Feb 2025

Accenture Technology *Milan, Italy*

Developed national public-sector healthcare applications primarily with Angular, TypeScript, and RxJS, with additional experience on a React-based project.

- Integrated REST APIs from Swagger/OpenAPI specifications and collaborated with backend engineers on data structures, API behavior, and troubleshooting.
- Translated Figma designs into responsive, accessible interfaces with strong attention to usability and WCAG-oriented development practices.
- Built reusable components and contributed to internal UI libraries documented in Storybook for development and stakeholder review.
- Worked with product managers, designers, backend engineers, and other frontend developers across the full delivery lifecycle, including testing, code review, Git workflows, and CI/CD.

Frontend Developer & UX Designer

Dec 2021 – Nov 2023

GameStop *Milan, Italy*

Contributed to the international redesign of GameStop's e-commerce platform across six European markets using JavaScript, TypeScript, .NET/ASP.NET, REST APIs, and selected PHP backend functionality.

- Designed and implemented UX/UI and frontend logic for the Italian market within a shared modular codebase supporting country-specific features and marketing requirements.
- Built new customer-facing functionality from scratch, including account-area features, promotional experiences, and the GS Deals digital flyer.
- Developed reusable modules, integrated APIs, and supported internal workflows related to product updates and resale processes.
- Worked across frontend, UX, stakeholders, and international teams while reviewing code from engineers at different seniority levels.
- Contributed to a redesign followed by a 22% increase in SEO score, 7% reduction in bounce rate, and 30% increase in conversions after release.

Additional Experience (Volunteering)

Web Content Creator

Feb 2021 – Mar 2023

Starting Finance *University of Pisa, Italy*

Created financial news content, visual reports, infographics, and social-media assets using Illustrator, Photoshop, and Canva for Starting Finance's educational media channels.

Technical Skills

- Frontend** TypeScript, JavaScript ES6+, Vue 3, Composition API, Pinia, Vuex, Angular, React, RxJS, HTML5, CSS3, Tailwind CSS, Bootstrap, responsive design
- Backend** Laravel, PHP, Node.js, Express.js, REST APIs, authentication and authorization, validation, database migrations, basic .NET/ASP.NET
- Database** PostgreSQL, MariaDB; project experience with MongoDB
- AI Integration** OpenAI, Claude, Gemini, RAG, retrieval logic, prompt engineering, conversation history, tool/API calling, guardrails, streaming responses
- Delivery & Infrastructure Exposure** GitHub Actions, Docker, AWS, Azure, Vercel, Kubernetes
- UX/UI** Figma, Adobe XD, usability testing, accessibility, responsive design, Photoshop, Illustrator
- Testing** Playwright, Jest, unit testing, integration testing, end-to-end testing
- Architecture & Engineering** Component architecture, design systems, SOLID principles, clean architecture, API integration, Git, code review, CI/CD wrkf.

Education

Università degli studi di Pisa Pisa, Italy

Bachelor's Degree in Finance, Banking and Financial Markets
Thesis: Mathematical Models for CDS Pricing under Stochastic and Regression Approaches
Graduated 2021 — 110/110 cum laude

Languages

Italian	Native - (Mother Tongue)
English	Fluent - C1 CEFR (Certified)
Spanish	Beginner
Danish	Beginner

Certifications

Complete Angular Developer Bootcamp Zero to Mastery Academy Feb 2024	Mastered Angular framework concepts, from basic to advanced topics, enabling the development of scalable and efficient web applications.
Front End Development Libraries (React) freeCodeCamp Aug 2023	Gained proficiency in React.js and related libraries, including Redux and React Router, to build dynamic and interactive web applications.
HTML, CSS, and JavaScript for Web Developers Johns Hopkins University Oct 2021	Learned to create responsive web pages using HTML5, CSS3, and JavaScript, focusing on modern web design principles and best practices.
Google UX Design Certification Google & Coursera Sep 2021	Completed a comprehensive program covering user experience design fundamentals, including user research, wireframing, prototyping, and usability testing, culminating in a professional UX portfolio.

Working Style

My path into software development from finance has made continuous learning a central part of how I work. I tend to adapt quickly to new technologies and changing requirements, while naturally looking for alternative approaches when a product or technical problem can be solved more effectively. I enjoy taking ownership from an initial idea through design, implementation, and delivery, and work best when there is a clear objective while still having room to experiment and improve the solution.

I also value fairness, openness, and shared ownership within a team, and try to combine independent initiative with constructive collaboration and code review.

Hobbies

- Gaming & storytelling** Particularly enjoy challenging or narrative-driven games such as Dark Souls, Elden Ring, and Outer Wilds, as well as running Dungeons & Dragons campaigns as a Dungeon Master.
- Design & creativity** Often experiment with Figma and Photoshop outside of work and enjoy exploring visual design ideas.
- Music & social** DJ at private events and enjoy board games with friends.
- Film & travel** Film enthusiast, particularly interested in directors such as Fincher, Nolan, and Zemeckis, and travel whenever possible.
